CHAPTER V

CONCLUSION AND RECOMMENDATIONS

5.1 Introduction

This chapter presents the summary of the proposed study design and implementation, summary of findings, conclusion, and recommendations based on the development and evaluation of the Gonzaga Dental Clinic Management Automation System (GDCMAS).

5.2 Summary of the Proposed Study Design and Implementation

The study aimed to analyze and design a Business Process Automation plan and centralized digital dental clinic management system for Gonzaga Dental Clinic. The researchers conducted analysis of current system, problem identification, system design, system development, and implementation.

5.3 Summary of Findings

1. The GDCMAS successfully centralizes patient records across both branches.
2. The system eliminates manual searching through physical files and cabinets.
3. The appointment scheduling module prevents double-booking and scheduling conflicts.
4. The multi-layered security approach effectively controls access based on roles and branch assignments.
5. The public booking portal provides convenient appointment request functionality.
6. The audit logging system ensures accountability.
7. Duplicate detection helps maintain data integrity.

5.4 Conclusion

1. Process Automation is Effective - The system successfully automates manual processes.
2. Centralization Solves Accessibility Issues - Eliminates need for physical transfer of records.
3. Security is Adequately Addressed - Role-based access control and RLS protect sensitive data.
4. Efficiency is Improved - Significant improvement over manual paper-based system.
5. The System Meets the Identified Needs - Addresses all specific problems identified.
6. Ready for Implementation - With proper validation and training, ready for deployment.

5.5 Recommendation

For the Gonzaga Dental Clinic:

1. System Validation - Review and validate all configurations before deployment.
2. Data Migration - Create plan for encoding existing paper records.
3. Staff Training - Conduct comprehensive training for all users.
4. Data Privacy Compliance - Ensure compliance with RA 10173.
5. Backup and Recovery - Establish proper backup strategy.
6. Public Booking Security - Implement rate limiting and bot protection before internet exposure.

For Future Development:

1. Reporting Module - Add comprehensive reports and analytics.
2. SMS/Email Notifications - Implement automated appointment notifications.
3. Payment Integration - Add payment tracking functionality if needed.
4. Mobile Application - Develop mobile version for easier access.
5. Integration with Other Systems - Extend integration capabilities as needs evolve.
